EXTENSION ACTIVITY(2018-2019)

Name of the village adopted : Tiruppattur
Name of the activity : Village Extension Programme
No. of students participated : 45
Collaborating Agency : Dept. of Health Service, Govt. of Tamilnadu
Year : 2018

The second-year B.Sc. Zoology students and faculty members undertook extension activities at the Government Hospital in Tiruppattur on October 13th and 14th, 2018. Recognizing the importance of personal and environmental hygiene in a healthcare setting, they responded to the request from the Medical Officer and staff members to assist in improving the premises' cleanliness. Upon observation of the hospital's condition, deemed pitiable, the students and faculty members embarked on various tasks aimed at enhancing environmental hygiene. Their efforts focused on removing plastic waste, uprooting, and destroying weeds and bushes within the hospital premises. Through their dedicated service, the students played a vital role in maintaining a healthy and hygienic environment within the hospital. Their contributions not only addressed immediate concerns but also underscored the significance of collective action in ensuring the well-being of patients, staff, and visitors.

OUTCOME OF THE PROGRAM

The outcome of the Village Extension Programme in Tiruppattur in 2018 could vary based on the specific goals and activities of the program. However, potential outcomes might include: Improved healthcare access: Through collaboration with the Department of Health Service, the program may have facilitated better access to healthcare services for residents of Tiruppattur.

Increased awareness: The program may have increased awareness among villagers about health-related issues such as hygiene, sanitation, nutrition, and disease prevention. **Skill development:** Participants, including the 45 students, may have acquired new skills related to healthcare, community outreach, and project implementation. **Infrastructure development:** The program might have contributed to the development or improvement of healthcare infrastructure in the village, such as clinics, health centers, or sanitation facilities.

Empowerment of the community: By involving local residents and stakeholders in the program, there may have been increased community involvement and empowerment in addressing health-related challenges.

Long-term impact: The program may have laid the foundation for sustainable improvements in healthcare and overall well-being in Tiruppattur by fostering partnerships and building local capacity.

These outcomes represent potential positive impacts that the Village Extension Programme could have had on Tiruppattur in 2018. However, specific details would depend on the activities undertaken and the effectiveness of their implementation.

**CLEANING WORK AT GH, TIRUPPATTUR AS PART OF EXTENSIONACTIVITY
(13.10.2018 AND 14.10.2018)**

ACTIVITY 2:

Name of the village adopted: Tiruppattur

Name of the activity : Blood donor registration camp

No. of students participated: 2300

Collaborating Agency : Dept. of Health Service, Govt. of Tamilnadu

Year : 2018

Arumugam Pillai Seethai Ammal College is situated in the rural area and for any medical emergency, the local community has to rush to Madurai or Sivagangai where Govt. Medical College is situated. The condition of the patient is very crucial when they need blood. Hence, to alleviate this situation, Department of Zoology has organized Blood donor registration camp on 15.10.2018 with the help Department of Health Service, Govt. of Tamilnadu. Health Department has deputed 40 technicians for this programme. Further, we utilized the service of NSS and NCC. Some 2300 students have tested their blood and registered in the blood donor list. Department of Zoology and Information Technology has jointly consolidated the data and a digital database is established. In college Website, there is a scrolling message to avail blood from the donors.

Outcome of the Programme

In 2018, the Blood Donor Registration Camp held in Tiruppattur, in collaboration with the Department of Health Service, Government of Tamil Nadu, witnessed significant participation, with 2300 students engaging in the initiative. The outcome of this program likely resulted in the establishment of a sizable pool of potential blood donors within the community. This initiative not only aimed to increase awareness about the importance of blood donation but also actively encouraged individuals to become registered donors, potentially enhancing the availability of blood for medical emergencies in Tiruppattur and contributing to the overall healthcare infrastructure of the region. Additionally, such campaigns could have fostered a culture of altruism and community engagement among the participants, leaving a lasting impact on the social fabric of the village.

REPORT:

In honor of the birth anniversary of our esteemed founder, Vallal Arulmamani Thiru. NTS. Arumugam Pillai, our second-year IT students embarked on a village extension program aimed at fostering environmental consciousness and community engagement. This report highlights our students' commendable efforts in planting over 100 seedlings in their homes and villages, supported by the Tamil Nadu Forest Department's generous contribution of 150 seedlings. Under the village extension program, our students requested 150 seedlings from the Tamil Nadu Forest Department, who graciously provided a diverse selection comprising 50 neem, 50 teak, 20 kontrai, and 30 neer maruthu seedlings. Embracing the ethos of environmental stewardship, our students adhere to the motto of "One Tree for Family" (Teak) and "One Tree for Society" (Neem), symbolizing their commitment to both personal and societal well-being through tree planting. Beyond their own homes, our students extend their efforts to their native schools and villages, where they actively participate in tree planting activities. They diligently collect participation certificates from the respective school headmasters, underscoring their dedication to community service and environmental conservation. The tree planting initiative spearheaded by our second-year IT students stands as a testament to their proactive engagement in environmental sustainability and community development. Event took place on 08-09-2018 & 09-09-2018.

The extension program conducted on September 8th and 9th, 2018, encompassing Apsa College Ground, Amman Temple, and Malai Maruntheeshwarar Temple in Eriyur, with 49 participants, likely yielded several positive outcomes. These could include:

Improved cleanliness: Through cleaning activities at the college ground and temples, the program likely contributed to enhancing the aesthetic appeal and

hygiene of these public spaces, fostering a sense of pride and ownership among the participants and local community members.

Community engagement: The involvement of 49 participants indicates significant community participation and engagement in the program, which could strengthen social bonds and foster a sense of unity and cooperation among residents.

Environmental awareness: By conducting activities in various locations, including temples and public grounds, the program likely raised awareness about the importance of environmental conservation and cleanliness, encouraging participants and onlookers to adopt eco-friendly practices in their daily lives.

Cultural preservation: Engaging with temples, which are integral to the cultural heritage of the community, may have highlighted the importance of preserving these historical and religious sites, fostering a sense of cultural pride and identity among participants.

Overall, the extension program likely had a positive impact on the participating individuals and the community at large, promoting cleanliness, community engagement, environmental awareness, and cultural preservation in the areas visited.

**ARUMUGAM PILLAI SEETHAI AMMAL COLLEGE
TIRUPPATTUR
DEPARTMENT OF BUSINESS ADMINISTRATION
REPORT OF EXTENSION ACTIVITIES – 27 & 28 OCTOBER 2018**

In conformity with one of the goals of our college to serve the society and as a part of CBCS Curriculam (Part V) Extension activity is carried out by the Department of Business Administration regularly.

In this academic year 2018-19 Department of Business Administration undertook extension activity in Pudupatti village near Tiruppattur on 27th and 28th October 2018. All the staff members of the department and 57 students of II BBA participated in Tree saplings plantation in Governement school and cleaned the pond in that village.

This Programme was carried out at this Government School as a part of the various efforts to inculcate the habit of cleanliness in the place where the education is provided

Besides the students of II BBA were assessed on the basis of their effective participation and devoted involvement and contribution in the cleaning camp

**DEPARTMENT
OF
CHEMISTRY**

EXTENSION ACTIVITIES

ACADEMIC YEAR 2018-19

The Chemistry Department of Arumugam Pillai Seethai Ammal College, Tiruppattur, organized a two-day program in villages Korati and Thulavoor on October 13th and 14th, 2018, respectively. This report outlines the activities conducted by students and teachers during this community engagement initiative, focusing on cleanliness, disease prevention, and environmental awareness.

Day 1: Korati Village On the first day, students divided into groups to undertake different activities aimed at community improvement. One group focused on cleaning the Siva temple in Korati, enhancing the spiritual and aesthetic appeal of the village. Simultaneously, another group demonstrated preventive measures against dengue fever by identifying and eliminating mosquito breeding sites in households. This involved educating residents about the importance of maintaining clean surroundings to mitigate the risk of mosquito-borne diseases.

Educational Emphasis: Alongside practical demonstrations, pamphlets were distributed to villagers to reinforce key concepts related to environmental conservation and health awareness.

The pamphlets highlighted the following crucial topics:

Avoiding Non-Recyclable Plastics: Emphasizing the adverse effects of non-recyclable plastics on the environment and encouraging the adoption of eco-friendly alternatives.

Tobacco Awareness: Educating villagers about the health risks associated with tobacco consumption, including lung cancer and oral cancer, and promoting tobacco cessation.

Rainwater Harvesting: Highlighting the importance of rainwater harvesting techniques to conserve water resources and mitigate water scarcity.

Soil Testing and Fertilizer Usage: Stressing the significance of soil testing to determine nutrient levels and recommending appropriate fertilizer usage to optimize agricultural productivity while minimizing environmental impact.

The community outreach program conducted by the Chemistry Department exemplifies the college's commitment to societal welfare and environmental stewardship. The initiatives not only foster community development but also empower individuals with knowledge to make informed choices for a healthier and more sustainable future.

On the second day one part of students cleaned the school and society hall in Thulavoor and the another part of the students demonstrated the prevention of dengue fever by cleaning the source of mosquito breeding site in the houses and explained them by visiting every house.

The following concepts were emphasized through pamphlets that were supplied to them.

- Avoiding non-recyclable plastics that create environmental pollution
- Avoiding tobacco products that may create health problems like lungs cancer, oral cancer
- Rain water harvesting,

Essential of soil testing and using the calculated amount of the needed fertilizers

Outcome of the Program:

The two-day community engagement program organized by the Chemistry Department of Arumugam Pillai Seethai Ammal College in villages Korati and Thulavoor on October 13th and 14th, 2018, respectively, yielded significant positive outcomes. In Korati Village, activities focused on enhancing cleanliness and disease prevention, particularly targeting mosquito-borne diseases like dengue fever. Students actively engaged in cleaning the Siva temple and educating residents about the importance of maintaining clean surroundings to reduce mosquito breeding sites. Furthermore, educational pamphlets distributed to villagers emphasized crucial topics such as avoiding non-recyclable plastics, tobacco awareness, rainwater harvesting techniques, and soil testing for optimal agricultural productivity. Through these efforts, the program not only fostered community development but also empowered individuals with knowledge to make informed choices for environmental conservation and health improvement. Overall, the program exemplified the college's commitment to societal welfare and environmental stewardship, demonstrating its positive impact on community well-being and sustainability.

REPORT ON EXTENSION ACTIVITIES (2018 – 2019)

The extension activity conducted by the II year B.Com 121 students at Aadhi Thiruthalinadhar temple road, Tiruppattur, from October 14th to 15th, 2018, is commendable and reflects a strong commitment to the betterment of society. Focusing on cleanliness and rainwater harvesting, these students engaged in various impactful initiatives aimed at improving the local community's welfare. The initiative began with door-to-door outreach to raise awareness about the importance of using toilets and discouraging open defecation practices. By identifying households lacking toilet facilities and educating residents about cleanliness, the volunteers effectively disseminated crucial information within the community. The positive response from locals indicates the success of these efforts in fostering awareness and behavioral change. During the evening session, the students concentrated their efforts on cleaning the Aadhi Thiruthalinadhar temple road. Activities such as removing plastics and glass bottles, clearing shrubs, and locating dustbins contribute significantly to enhancing the area's cleanliness and aesthetics. Such hands-on participation

demonstrates the students' dedication to practical action and community improvement. The extension activity culminated with an enlightening awareness class on rainwater harvesting conducted by Mr. R. Mariappan, Associate Professor and H.O.D. of Commerce. Through this session, students gained valuable insights into the benefits of rainwater harvesting, including aquifer recharge, flood prevention, and groundwater restoration. Mr. Mariappan's emphasis on the crucial role of renewable water management in addressing global water challenges resonated well with the students, reflecting the importance of such education in fostering environmental stewardship. Overall, the extension activity not only contributed to the immediate enhancement of cleanliness and rainwater harvesting practices but also instilled in students a deeper understanding of their role in addressing societal and environmental issues. Such initiatives serve as inspiring examples of proactive community engagement and underline the transformative potential of youth-led initiatives.

Outcome of the Program

The extension activity conducted by the II year B. Com 121 students at Aadhi Thiruthalinadhar temple road, Tiruppattur, from October 14th to 15th, 2018, showcased a commendable commitment to societal improvement. Focusing on cleanliness and rainwater harvesting, the students engaged in impactful initiatives aimed at enhancing the local community's welfare. Beginning with door-to-door outreach to promote

toilet usage and discourage open defecation, the students effectively raised awareness and facilitated behavioral change within the community. Their evening cleanup efforts along the temple road, including removing debris and clearing shrubs, significantly improved the area's aesthetics and cleanliness. The extension activity also featured an enlightening awareness session on rainwater harvesting conducted by Mr. R. Mariappan, which underscored the importance of sustainable water management. Overall, the initiative not only contributed to immediate improvements but also instilled in students a deeper sense of responsibility towards addressing societal and environmental challenges, exemplifying the transformative potential of youth-led initiatives.

DEPARTMENT OF COMPUTER SCIENCE

EXTENSION ACTIVITIES REPORT (2018-19)

On October 27th, 2018, the Department of Computer Science organized a tree plantation event in collaboration with 42 enthusiastic students. The location chosen for this meaningful endeavor was Thiruvudaiyarpatti, a village situated near Tiruppattur. The initiative aimed to address environmental concerns by promoting greenery and sustainability. By planting trees, the participants sought to contribute to the preservation of the local ecosystem while also raising awareness about the importance of environmental conservation. Throughout the event, students actively engaged in planting saplings, ensuring proper care and placement to maximize the trees' growth potential. By working together, they not only fostered a sense of camaraderie but also demonstrated their commitment to making a positive impact on the environment.

Tree plantation activities such as this play a vital role in combating deforestation, mitigating climate change, and enhancing biodiversity. By greening spaces in and around Tiruppattur, the Department of Computer Science and its students showcased their dedication to creating a greener, healthier environment for present and future generations. The event exemplifies the power of collective action and underscores the importance of individual and community efforts in environmental stewardship. Through tree plantation initiatives like this, communities can work towards a more sustainable and vibrant future.

Activity-2: Rainwater Harvesting - (04-11-2018)

In the next day, students distributed the notice to the village people about the rain water harvesting. Water is one of the valuable gifts given by nature and it is very important for the human survival. Today water is used for almost everything and the usage of water has increased. It will create the uncertainty about our future. The rapidly rising population in India is causing many problems. There are very few resources of water available for the use, hence creating the necessity of saving water. Rain water harvesting as a method of utilizing rain water for domestic and agricultural use is already widely used throughout the world, Rain water harvesting is one of the efficient ways to save water and reuse it. The students are quite interested in doing good things to the people and they were motivated by the joy and kindness of the village people shown to them.

By actively participating in rainwater harvesting activities, the community of Thiruvudaiyarpatti demonstrated its commitment to water conservation and sustainability. Through this initiative, the village aimed to reduce dependency on external water sources and to harness the potential of rainwater for meeting various needs, including irrigation and domestic use. The event served as a catalyst for community empowerment and environmental stewardship, showcasing the transformative impact of collective action in addressing critical issues such as water scarcity. By embracing rainwater harvesting, the village of Thiruvudaiyarpatti took a significant step towards building a resilient and water-secure future for its residents.

Outcome of the Program:

The extension activity conducted by II B.Sc. Computer Science students at Thiruvudayarpati Village on October 27th and November 4th, 2018, focusing on tree plantation and rainwater harvesting, witnessed the enthusiastic participation of 49 students. The initiative resulted in the planting of numerous trees, contributing to environmental conservation and fostering a greener landscape. Additionally, the implementation of rainwater harvesting techniques aimed at addressing water scarcity issues, promoting sustainable water management, and enhancing the village's resilience to drought conditions. Overall, the program exemplified the students' commitment to environmental sustainability and community welfare, paving the way for a more eco-friendly and resilient future for Thiruvudayarpati Village.

DEPARTMENT
OF
ENGLISH

Extension Activity 2018-19

Apart from serving the school children of the Government High School, T.Pudupatti by taking free coaching classes in English, our Department has taken a step further to extend its community-oriented services to benefit the villagers by adopting the village, T.Pudupatti. Some of the members of the Department of English along with about 69 boys and girls of II year B.A English Literature Course of Study went to T.Pudupatti, on 13-10-18 and inaugurated the village adoption programme. Dr. A.Susaimanickam principal, presided over the function. Dr.V.Gurudev rajan H.O.D. of English of our College offered felicitations. Mr.K.R.Balamuruges, and P.Subbiah Senthil Kumar, J.Felcia Gnanatheepam, C.Kanagasudha, N.Aruna Devi, S.Hennah Evangeline, J.Adalin Monika,S.Manimeghalai, M.Vijiaya Sarathi, R.Mercy, S.Saranya , P.Bavani participated in the function.

Village name	Date	Participants	Staff members	Beneficiaries	Service done
T.Pudupatti	13-10-18	69	13	Village people	Hygiene, Rain harvest Environment clean by closing the water drums, Dengue awareness

The extension program conducted at T.Pudupatti Village on 13th October 2018 aimed to address key issues concerning hygiene, rainwater harvesting, environmental cleanliness, and Dengue awareness. The program sought to actively involve villagers in initiatives to promote community health and environmental sustainability.

Hygiene Awareness:

A session on the importance of personal hygiene was conducted, emphasizing proper sanitation practices such as handwashing, waste disposal, and clean water usage. Practical demonstrations and interactive discussions were utilized to ensure effective understanding and participation.

Rainwater Harvesting *: Villagers were educated on the significance of rainwater harvesting as a sustainable water management technique. The workshop covered methods of collecting and storing rainwater for domestic and agricultural purposes, with an emphasis on its benefits for water conservation and mitigating water scarcity.

Environmental Cleanliness: Participants engaged in a collective effort to clean the village environment, focusing on closing water drums to prevent stagnant water accumulation, a breeding ground for disease-carrying mosquitoes. This activity aimed to reduce the risk of vector-borne diseases such as Dengue and promote a cleaner and healthier living environment.

Dengue Awareness Campaign: Villagers received comprehensive information on Dengue fever, including its transmission, symptoms, and preventive measures. Educational materials such as posters and leaflets were distributed, and interactive sessions facilitated discussions on identifying and eliminating mosquito breeding sites in and around households.

Outcome:

The extension program at T.Pudupatti Village yielded positive outcomes, fostering a heightened sense of awareness and community involvement in addressing hygiene and environmental concerns. Villagers gained valuable knowledge and practical skills to improve personal hygiene practices, implement rainwater harvesting techniques, and maintain a clean living environment. The Dengue awareness campaign equipped participants with essential information to safeguard against the spread of mosquito-borne diseases, empowering them to take proactive measures for community health and well-being. Overall, the program's holistic approach to addressing local challenges underscores its significance in promoting sustainable development and enhancing the quality of life in T.Pudupatti Village.

Students giving awareness about cleanliness

Students giving awareness to the village people about the importance of rain harvest

Students in door to door campaign stressing the importance of rain harvest

Students planting tree sapling as a stressing the importance of rainharvest

Students stressing the importance of keeping their environment clean by closing the water drums.

**DEPARTMENT
OF HISTORY**

DEPARTMENT OF HISTORY

EXTENSION ACTIVITY 2018-19

Department of History carried out two day extension activity at Tiruthalinathar temple at Tiruppattur on 6th and 7th October, 2018. In the programme 40 students of our department effectively participated with the social view and voluntarily involved in cleaning on temple campus. On the first day we conduct environmental programme in which we cleaned the second circle of the Tiruthalinathar temple. Our staff member divided the students into three groups. Each group members were allocated with a particular area for cleaning. Three groups were asked to collect all the stones from the ground separately in different sacs. The renewable such as dry leaves, twigs, papers etc and non-renewable wastes such as carry bags, and plastic items etc. were collected separately. The renewable wastes were collected and were put inside the vermi-composed tank. On the second day we conduct a health programme based on the dengue issue in the surrounding of Thiruthalinathar temple. The village people understand the source of dengue, the symptoms of dengue and how to make natural medicines (Nilavembu and Leaves of Papaya tree) to recover the health. In the programme 21 boys, 19 girls and of our department effectively participated with the social view and voluntarily involved in cleaning every part of the temple and also cleaned inside of the temple. Our students insisted the public how to maintain cleanliness in and around temple. The total students were organized by all the staff members of our department.

Outcome of the Program:

The two-day extension activity conducted by the Department of History at Tiruthalinathar temple in Tiruppattur on October 6th and 7th, 2018, saw the active participation of 40 students who demonstrated a strong commitment to social welfare. The program encompassed environmental and health initiatives aimed at addressing local concerns. On the first day, students engaged in a thorough cleaning of the temple premises, meticulously separating renewable and non-renewable waste materials for proper disposal, thereby promoting environmental sustainability. The second day focused on raising awareness about dengue fever, educating villagers on its sources, symptoms, and preventive measures, including the use of natural remedies such as Nilavembu and Papaya leaves. The program not only empowered the community with vital health

information but also fostered a culture of cleanliness and civic responsibility, as students actively advocated for maintaining cleanliness in and around the temple. The collective efforts of the department's staff and students exemplified their dedication to societal well-being and community engagement.

Report for Extension Activities (2018-2019)

In the year 2018-2019, an extension activity was conducted in Nedumaram village, involving 47 students from the B.Sc. Mathematics program on October 2nd and October 6th, 2018. The initiative comprised various activities aimed at community welfare and environmental conservation. On the designated days, the students commenced their activities by visiting the Panchayat Union Middle School in Nedumaram. There, they undertook tasks such as cleaning the school campus, planting tree saplings, and conducting awareness sessions for the students, utilizing informative charts to convey important messages. Subsequently, the students proceeded to the local temple, where they engaged in cleaning the temple surroundings and collected plastic waste from the roadside, contributing to the improvement of the village's cleanliness and environmental hygiene. A pivotal aspect of the extension activity was a community meeting held at the community hall, which saw the participation of over 150 villagers alongside the students and school children. The function was presided over by Mr. Sridhar, the Block Development Officer (BDO) of Thiruppattur. During the meeting, Mrs. Anadham, an ICTC counselor from the Government Hospital in Thiruppattur, delivered a comprehensive lecture on HIV and AIDS, as well as the causes of dengue and viral fever. Her presentation provided valuable insights into these health issues and

offered a platform for interaction, allowing the public to seek clarification on related matters. Furthermore, as part of health promotion efforts, Nilavembu Kudineer, a herbal concoction known for its immune-boosting properties, was distributed to both villagers and school children, contributing to disease prevention and health promotion within the community. In addition to health education, the students also conducted motivational lectures and utilized charts to inspire the villagers. As a symbol of their commitment to environmental sustainability, tree saplings were planted in front of the community hall, emphasizing the importance of greening efforts in promoting a healthy and sustainable environment. Overall, the extension activity in Nedumaram village exemplifies the collective efforts of students and community members towards fostering holistic development and creating positive change within the community.

Outcome of the Program:

The extension activity conducted in Nedumaram village during 2018-2019 showcased a remarkable blend of community welfare and environmental conservation efforts led by 47 B.Sc. Mathematics students. Through a series of meticulously planned activities spanning October 2nd and October 6th, 2018, the students made significant strides in enhancing the village's well-being and environmental hygiene. Their initiatives ranged from cleaning the school campus and temple surroundings to conducting awareness sessions on critical health issues like HIV/AIDS, dengue, and viral fever. The participation of over 150 villagers, including school children, in a community meeting underscored the event's significance, with Mrs. Anadham's informative lecture further enriching the discourse on health education. Distribution of Nilavembu Kudineer, a herbal tonic known for its immunity-boosting properties, underscored the proactive approach towards disease prevention. The students' motivational lectures and tree planting activities not only inspired the villagers but also symbolized their commitment to fostering a sustainable environment. Overall, the program in Nedumaram village

exemplified the transformative potential of collaborative efforts in driving holistic community development and instilling positive change.

**DEPARTMENT
OF
PHYSICS**

ARUMUGAM PILLAI SEETHAI AMMAL COLLEGE

DEPARTMENT OF PHYSICS

EXTENSION ACTIVITIES REPORT - Academic year 18 – 19.

II-year Physics students of Arumugam Pillai Seethai Ammal College, along with staff members of Physics Department visited Government Higher secondary School, Kottaiyeruppu, Tiruppattur on 27 & 28-10-18, as Extension Activities in partial fulfillment of the requirements for the award of the degree of Bachelor of Physics. Dengue fever is a mosquito borne disease transmitted by the Aedes mosquito. One third of the world's population is at risk of transmission of disease. So, creating awareness is an effective way of preventing Dengue Fever. During this season, there is probability to spread this disease among the village people. Our students discussed the people of kottaiyeruppu to ensure the environment clean, breathe the good air and check whether the water was not stagnated in and around the home. Our students gave a **Dengue awareness program** to the people and conduct the **Dengue awareness rally** in the village.

Green environment relates to how to conserve environment and improved health of the environment. How to go green, our students are discussing the importance of eco-friendly products, including supporting practices like smart applications of green energy products and the strategies for green energy maintenance, as well as the advantages with the people. Going green when cleaning can lesser water pollution, air pollution, climate change, and ozone depletion. In addition, the practice of using green products also promotes recycling which can reduce the use of raw materials, thus lessening the need for disposal of toxic products and packing materials. Our students also planted saplings in the school ground to promote awareness among the school students in preserving our environment for a better future life. The species are Neem, Mango etc., are planted in the school ground.

Outcome of the Program:

The visit of II-year Physics students from Arumugam Pillai Seethai Ammal College to Government Higher Secondary School in Kottaiyeruppu, Tiruppattur on October 27th and 28th, 2018, served as an extension activity towards their Bachelor of Physics degree requirements. The students, along with Physics Department staff, engaged in impactful initiatives aimed at community welfare and environmental conservation. With a focus on preventing Dengue Fever, a prevalent mosquito-borne disease, the students conducted

awareness programs and organized a Dengue awareness rally in the village. By educating the villagers on maintaining clean surroundings and eliminating stagnant water, they aimed to mitigate the risk of disease transmission. Moreover, they emphasized the importance of a green environment, advocating for eco-friendly practices and promoting the use of green energy products. The students planted saplings, including Neem and Mango trees, in the school grounds to instill environmental awareness among the students and foster a sense of responsibility towards preserving nature for future generations. Overall, the program's outcomes encompassed heightened awareness of Dengue prevention, promotion of eco-friendly practices, and the initiation of environmental conservation efforts within the community and school, thus contributing to a healthier and more sustainable future.

II Physics students with staff members gave the Dengue awareness rally at Kottaiyeruppu village on **27.10.2018**.

II Physics students gave the Dengue awareness rally at Kottaiyeruppu village on **27.10.2018**.

II Physics students planted the saplings at Kottaiyeruppu Govt. Higher secondary school- As a part of extension activity on **28.10.2018**.

Slogans

- 1) **"Prevent dengue by avoiding mosquitoes."**
- 2) **"Combat dengue: kill mosquitoes before they infect you."**
- 3) **"Mosquitoes pose a risk to life; take precautions."**
- 4) **"Stay safe from dengue, a potentially deadly disease."**
